PROJECTS

Training and Learning Management System

- Created a training and learning management system with a 10-member team using SwiftUI, Git, and GitHub.
- Delivered 3 applications: Administrator App (user/content management), Learner App (modules/progress tracking), and Educator App (content/assessments).
- Facilitated seamless integration and timely delivery through effective teamwork and communication.

Gaming Community App

- Developed a gaming community app using Swift and UIKit with a team of 4 during a school project.
- Implemented key features: Event Scheduler (create/manage events) and Find My Team (find/join teams).
- Contributed to design, implementation, and testing, ensuring a polished user experience.

Personal Portfolio Project

- Developed a responsive personal portfolio website featuring a bio, skills, projects, downloadable resume, and interactive contact form using HTML, CSS, and JavaScript.
- Integrated client testimonials and feedback to enhance credibility and showcase professional skills.
